

The Camp is located minutes from downtown Breaux Bridge, home of world famous Crawfish Festival, and Lafayette, La., host of annual Festival International.

It is the ideal setting to learn about fly fishing. From the manicured banks on the pond to the air conditioned classroom area, this facility is designed with the student in mind.

"These pros put on a very professional and educational camp that was well worth the value. My confidence in my fly casting ability has been elevated greatly. We are lucky to have such a world class fly casting instructional format right in our midst. Because of the knowledge gained from this camp, I now thoroughly understand the mechanics of fly casting better and, in turn, feel like I am a better fisherman."

- David Luquette, former student

Fly School Consultants...

Tom Jindra - From New Orleans, is an FFF master certified casting instructor and past president of the Federation of Fly Fishers

The School... is designed to be comprehensive, concentrating on casting mechanics, improving accuracy & distance. We offer beginning to advance level programs. If you are a beginner and you want to improve your casting skills with instruction from top instructors in the region, this is the workshop for you! Considering being an instructor? Consider our Prep class!

What to expect... Classes are designed to be well organized, fun, & educational. We want you to leave our program with the confidence of having attended a premiere fly casting school. At least 1 master will be present. We can offer individual or group sessions on or offsite upon request. Our students -to-instructors ratio will be no greater than 5:1 to insure individual attention.

Introductory Class... During the course of the day, students will participate in indoor air conditioned lecture presentations as well as outdoor casting exercises. All casting demos are performed on-the-water to provide real-life experience. Students will be taught the basics of rod & line assembly & maintenance. The fundamental Pickup and Lay down cast, false casting, & roll casting instruction will give the students a solid foundation to continue practicing on their own.

Advanced & Instructor Prep Class... These classes are designed to pick up where the Intro course left off. Emphasis will be on loop control, the double haul, distance casting, handling the wind, accuracy, roll casting, the principles governing a well executed cast. In addition, during the Instructor Prep class, all aspects of the performance test will be emphasized giving the students in-depth info to best prepare themselves for becoming an instructor.
